Subject: Information request: Contact information for the contractor working in the clean up for the Upper Animas River

Jasmin,

Good morning. Thank you very much for providing Wendy as a contact for the information request we received.

Wendy,

Good morning. I am the editor in chief for the agency's nutrient policy and data resource directory and received an information request from Mr. Alan Scott. He is interested in the contact information of the contractors working in the clean up in the Upper Animas River (see the email trail below). I provided Mr. Scott with the information I was able to access through a simple internet search and would appreciate for you to follow up with him.

Thanks in advance,

Janice

Mr. Scott,

Good morning. Thank you very much for your interest in getting involved with the cleanup in Region 8. The contact information for the contractor(s) working in the spill is under the purview of our regional office –US EPA headquarters provides the funds and the region makes the contract/hiring decisions. I recommend you contact Region 8 and ask to be directed to the emergency response team and/or superfund program. The contact number for Region 8 is (303)312-6312.

In order to get some additional information on your request, I did a quick google search for US EPA Region 8 Emergency Response Start contractors and was able to pull some past information on EPA contacts as well as existing contractors for the region. I am including the link to this information, hoping this could be a good starting point for you.

Address: **Personal Address/Ex. 6**

Comments: I have 10 years experience as an environmental tech with former EPA contractor in region 4. Having seen the devastating news about the gold mine spill I was thinking I might be able to get involved in the clean up. Would you please advise the name of contractor working the spill. I am a senior tech and I believe there will be a need for a few people who know what to do at the E.R at that location. I worked at the former mine area in Rico, CO a few years ago and am aware of how sensitive the residents are concerning their water. Any information appreciated.

Hola Janice,

Wendy Dew is helping to coordinate any emails about the Upper Animas Site to the correct people. She is cc'd here. You can forward any of the emails to her if you'd like.

Gracias,

Jasmin
